

AUGUST 2009

NUMBER 29 AND COUNTING....

True Temper was again in the winners' circle last week. Finishing with an eagle on the final hole the champion claimed his first PGA Tour victory with Dynamic Gold in his irons.

The win marked this season's 29th PGA Tour victory for shafts designed and manufactured by True Temper. Along with the victory, True Temper products dominated the weekend with all Top 10 money positions and 96 percent of the final field playing shafts by True Temper.

On the European Tour the winner took his victory with Project X in his irons and wedges. These two wins once again highlight how impressive the True Temper full line of products really is.

Dynamic Gold steel shafts are the top-selling steel shaft in golf and are preferred by skilled players seeking a controlled, penetrating ball flight. Dynamic Gold shafts are available in tapered and parallel irons and parallel woods.

True Temper's Project X shafts are an enormously popular line of shafts which have earned worldwide acclaim. Project X features a unique variable taper design with a dedicated taper rate per inch for each shaft in the set. Longer taper rate results in more energy transfer to the ball for a faster and flatter penetrating trajectory. Dynamic Gold shafts are available in tapered and parallel irons and parallel woods, while Project X steel shafts are available in tapered and parallel irons.
