

JULY 2009

TRUE TEMPER DOMINATE ON THE LINKS

The 2009 Open Championship was one full of memories. With one of the games greats dominating right to the end, and two of Britain's leading talents also contending. However it was one of golf's most famous names that helped clinch the title for the new champion. Dynamic Gold notched up yet another major victory. Having been the number one steel golf shaft on tour for over 30 years, the shaft still produces champion after champion in golf's major events.

True Temper was not only evident in the clubs of the champion, but throughout the rest of the top ten as well. The top 10 breakdown is as follows:

Dynamic Gold	-	7 players
Dynalite Gold	-	1 player
Rifle	-	1 player
JZ by TT	-	1 player
Project X	-	1 player

True Temper yet again clearly dominated iron shafts in the top 10. However they had great usage in woods, with the runner up using Grafalloy in his Hybrids and the South African who has previously won the Claret Jug using the new PX10A2 in his 3 wood and Rifle Lite in his 5 wood.

Dynamic Gold still sets the standard in steel golf shafts.
