

TRUE TEMPER®

THE #1 SHAFT IN GOLF

MAY 2009

STENSON STORMS THROUGH AT SAWGRASS

Five back going into the final round the Swede fired a superb final round of 66 to claim the 2009 Players Championship. Having the Blue shaft in his woods, the new world number five missed only two fairways over the weekend. With a great display from tee to green the Swede showed great accuracy with his iron play. Powered with the new Dynamic Gold tour issue shafts in his irons the champion took a step closer to his first major championship.

The Grafalloy Blue shaft is the first ultra-light shaft designed specifically for oversized drivers. Blue's patent-pending Micro-Mesh Tip technology delivers the perfect combination of tip stability and energy transfer. The result is our longest hitting shaft ever. Get blue, it's great for big heads!

As the number one shaft manufacturer, True Temper is thrilled to continue it's 2009 PGA winning streak. The Players Championship marks the 16th straight and 19th cumulative win this season on the US Tour.

Dynamic Gold shafts are preferred by better players who want a low, penetrating ball trajectory. The shafts are engineered with tapered and parallel irons and parallel woods.
